Summary

Proficient Full Stack developer skilled in the MERN stack (MongoDB, Express, Node.js, React) and SQL.

Expert in React for seamless front-end development and scalable server-side applications.

Strong foundation in computer science, adept at solving complex challenges.

Education

Faculty of Engineering, Tanta University   Sep. 2018 – May 2023
Bachelor's degree in Computer Science   *Tanta, Egypt*

Experience

FTL Group   2023 – May 2024
Node.JS Web Developer   *1st Settlement, Cairo, Egypt*

- Demonstrated leadership and technical expertise by leading the development of various applications, expanding the company's product range.
- Proven ability to quickly adapt to new technologies, ensuring innovative project execution.
- Integrated multiple shipping APIs into FTL Erates, broadening shipping options for users.
- Led cross-functional teams to ensure timely project delivery and adherence to quality standards.
- Designed and implemented advanced dashboards, improving operational efficiency and user experience.

Freelance Work   2022 – 2023
Freelancer

- Successfully completed multiple freelance projects for various clients, delivering high-quality software solutions tailored to their specific needs.
- Developed robust and scalable solutions using technologies such as Nest.JS, Node.JS, GraphQL, and Next.JS 13.

Projects

FTL Erates   2023 – present

- Integrated multiple shipping lines for rate comparison and shipment tracking.
- Enhanced dashboard streamlines supply chain management for businesses and individuals.

Masnaay   2023

- A free platform accessible to all, where managing a business page incurs no cost whatsoever.
- Features a user-friendly dashboard for managing the website.

We Care   2023

- A telemedicine platform connecting patients with healthcare professionals. Includes separate dashboards for patients and administrators.
- Developed as a graduation project in collaboration with a team of 6 individuals.

Instagram Clone   2022

- Web application replicating Instagram's features and design, covering front-end and back-end aspects.
- Covers essential features such as user authentication, profile management, feed browsing, post creation, liking, commenting, and more.
